

Mourne Photographic Archive Project

The ***Mourne Mountains Landscape Partnership***, in association with the *Centre for Data Digitisation and Analysis at QUB*, is hosting a number of events to capture images of Mourne in days gone by. This information will be used to create an electronic archive which will be shared via the ***Mournelive*** website (eg of photos, written documents, artefacts etc).

Photos will be scanned while you wait and information relating to the photo will be recorded. The scanned image will be digitally enhanced and the owner will be supplied with digital copies of all their images. Traditional artefacts can also be photographed during these events.

Themes that are of interest to this project include:

Quarrying and the granite industry; the building of the Mourne Wall/Silent Valley/Binnian Tunnel/Ben Crom Dam; Annalong Cornmill & the built heritage of the area; Traditional ways of life (eg traditional and hearthside skills)
